

700351

Name

Hospital No. Strong Mem.

Date of birth

Date of injection - Nov. 27, 1945

4.9 mg ²³⁵Pu (IV) citrate

Age at injection - 49

Date of death

Age at death

Time after injection 27 yr
76

Death Certificate No.

Hp-3

This patient, a forty-nine year old white female, was admitted to the hospital with complaints of pigmentation of the skin, pruritic dermatitis and dependent edema. Initial clinical studies were carried out in November and December 1945, at which time diagnoses of hepatitis of unknown etiology and hypoproteinemia were made. She was admitted for follow-up examination in October 1946, when she appeared in good health.
